

# CONTRACT FINANCING ASSISTANCE PROGRAM

## Bridging the Cash Flow Gap

One of the biggest barriers to small and diverse contractor participation in public agency projects is the minimum 60-day delay between when work begins and when contractors get paid. Our Regional **Contract Financing Assistance Program (CFAP)** is a new and innovative lending program to help contractors with the cash flow needed to successfully deliver on participating sponsor projects.

These short-term loans provide a vital financial lifeline, enabling contractors to meet their payroll and materials costs during construction and until they get paid. Most small and diverse contractors will qualify for a Program loan, as long as they have a contract to work on a participating sponsor project.

### **Are you a public agency seeking to expand your small business partnerships?**

Let us share how the Contract Financing Assistance Program can help you achieve your participation and inclusion goals, mitigate project risk and build small contractor capacity.

**Are you a small and/or diverse contractor who has been awarded a contract with any of our below-listed sponsors?** Contact us now to learn how to qualify for the Contract Financing Assistance Program and our many additional no-cost support services available for local small and diverse contractors interested in public works contracting.
