“The basic service principals and tenets of Birdi And Associates, Inc. are built upon a foundation provided by a diverse group of industry leaders. Common and unchanging across all of these is our principal that all our abilities, every talent and each decision is made in the best interest of the client.”

— Birdi & Associates

Birdi & Associates

Birdi & Associates, Inc. is a Certified Small Business and Disadvantaged Business Enterprise (DBE) providing professional consulting services in Technology, Security, Software Development, System Maintenance and Project Management. In addition, we are constantly improving our service delivery by developing in house software products including the Airport Security Assessment Toolset (ASAT) and the Project Resource Planning and Management (PRPM). Birdi and Associates, Inc. is currently developing two products in support of its services including tools for Project Management and tools for Maintenance of Mission Critical Systems.

From Service to Solutions

As engineers we are experts in developing Solutions for our clients but the Solution is not our goal rather only one of the means to an end. Our continuous and ultimate goal is to provide the best Service to our clients. Developing the right Solution and integrating it into the overall technical and operational environment and ensuring that it serves the best interest of our client is all important to us as we stretch our capacities in delivering world class Service to all our clients.

Products

Our projects and tools are developed using suite of technologies from Microsoft. We extensively use Microsoft Visual Studio 2008 and develop our projects using some of the latest development frameworks from Microsoft e.g. .NET Framework (ASP.NET, VB.NET, C#), SQL Server, WPF, SSIS, SharePoint, on Windows 2008 Server Platform.

These mature technologies from Microsoft provide our experts right tools to implement solutions for complex business problems.

We extensively use Microsoft Project in our Project-Management assignments and Sharepoint for our document management needs.

Our Services Include:

- Aviation Security Consultancy
- Project Management
- Project Control
- Construction Management
- Planning & Design Services
- Software & System Development
